Disconnect your USB audio or video device and connect again. Then go into device settings and get jiggy with it.

Still no bueno? Unplug all your USB devices and audio / video devices and start connect only the audio / video Device. Then go into device settings and get jiggy with it.

Go to your audio Settings on your PC and disable the device and then enable it. Then go into device settings and get jiggy with it.

If nothing worked then give it a restart. Some one 'not famous' always said, Reboot is the new hope and hope is a delayed disappointment, maybe". Then go into the device settings and get jiggy with it.
